THREE NATION-WIDE SURVEYS

Three nation-wide surveys have been made to determine the extent and intensity of the agricultural cooperative movement. The first of these was begun in 1913 and was continued through 1915, when data for the years 1912, 1913, 1914, and 1915 were collected. Reports were obtained from 5,424 organizations and this collection of data was the basis of the statistical portion of Department of Agriculture Bulletin No. 547, published in 1917.

In 1919, data relative to the extent of cooperative buying and selling by farmers were collected as a part of the agricultural census, made by the Bureau of the Census. These were so compiled as to show the number of farms in each State reporting sales or purchases, and the amount of business involved in these transactions. As the census enumerators covered every township in the United States, the data, so far as the items covered are concerned, are complete and are of great value in connection with statistical studies of the subject. Furthermore, the data make possible a comprehensive picture of the status of agricultural cooperation in 1919.

Early in 1922 the third survey of cooperative buying and selling was undertaken. This contemplated an enumeration and listing of all active farmers' business organizations by kinds of products handled and by States, cities, and villages. Sixty thousand individuals scattered through the 48 States, assisted in obtaining the

¹ Much of the work in connection with compiling the statistical tables was done by William H. Baker and Grace Wanstall.

names and addresses of associations of farmers engaged in selling or buying or both. Approximately 40,000 names were reported. After the elimination of duplicates there remained between 25,000 and 30,000 names of associations.

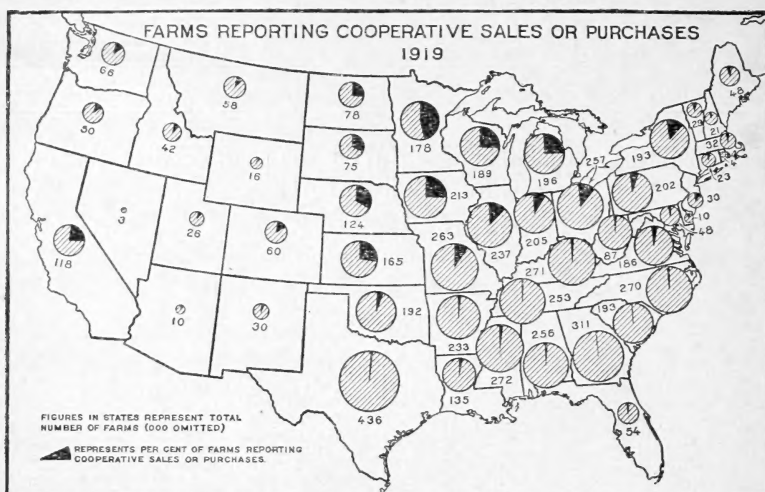

FIG. 1.—About a fourth of the farms in California, North Dakota, Kansas, Iowa, Wisconsin, and Michigan reported purchases or sales through cooperative associations in 1919, and considerably more than a fourth of the farms in Minnesota, South Dakota, and Nebraska made similar reports. (See Table 5.)

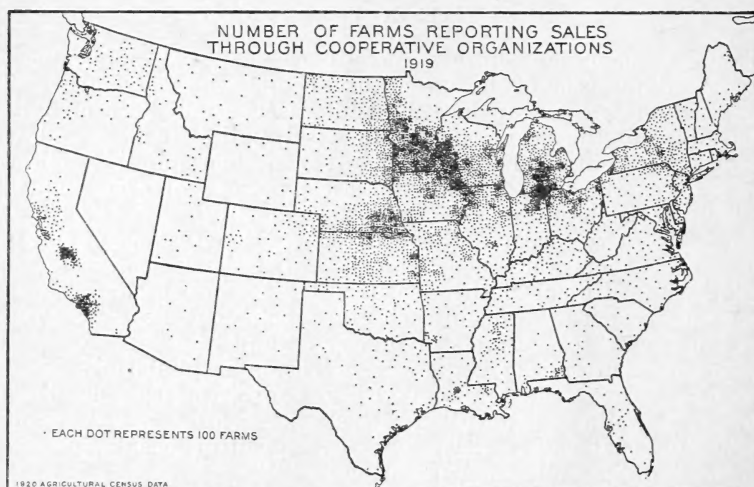

FIG. 2.—Cooperators were numerous in parts of Ohio, Michigan, Indiana, Illinois, Wisconsin, Iowa, Minnesota, Nebraska, and California in 1919; and cooperators were few in number in New England, the Southern States, and the Mountain States. (See Table 5.)

Subsequent follow-up work revealed that many organizations had been reported under two and three different names and some under four. Some of the associations reported were merely proposed organizations which had never been formed, and others had ceased

to function. As a result of a sifting process, extending over two years, and a continuous search for new associations, in March, 1924, the department files contained information regarding 10,160 active

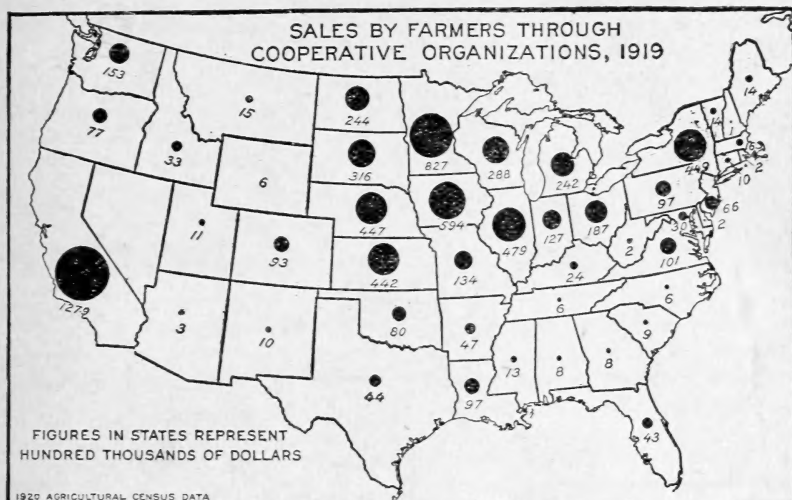

FIG. 3.—Sales by California farmers were greater than those by Minnesota and New York farmers combined. Most of the cooperative selling was done by the farmers in the North Central, the Middle Atlantic, and the Pacific States. (See Table 5.)

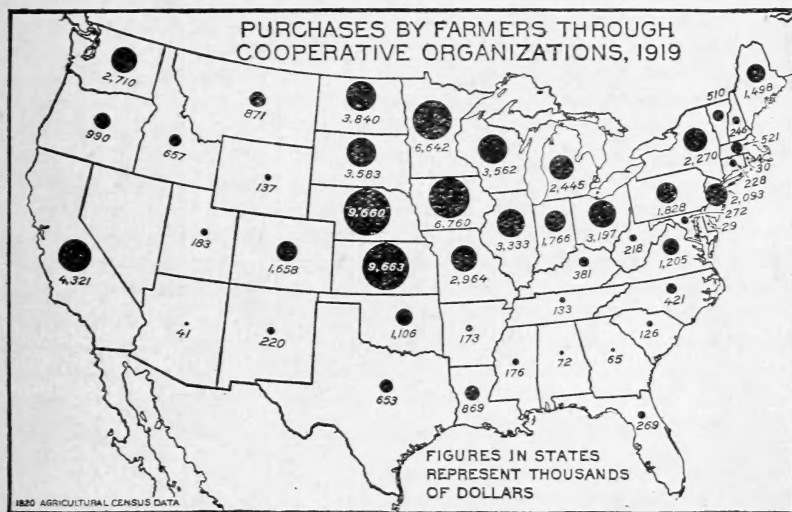

FIG. 4.—Kansas farmers made heavier purchases through cooperative associations than the farmers of any other State; Nebraska came close on the heels of Kansas and Iowa followed Nebraska. (See Table 5.)

organizations. These data, classified and tabulated, fill a majority of the following pages.

The character of the agricultural cooperative movement has been undergoing a change since about 1920. Prior to that year farmers' business organizations were mostly local enterprises with occasional

federations of locals for selling purposes. Both the total membership and the total amount of business were made up of a large number of relatively small items.

Since 1920 the "large" organization operating over an entire producing section or even an entire State has developed. The importance of this change in the development of agricultural cooperation in the United States will be appreciated when it is noted that 50 of these new "large" organizations have a membership that is larger than the total estimated membership of the 5,424 associations included in the 1915 study, and the amount of business handled annually by these "large" associations is greater than the total estimated amount of business for all the associations in 1915.

COOPERATION IN 1913-1915

Questionnaires returned by associations and covering the years 1912, 1913, 1914, and 1915 were used as the basis of the first comprehensive study. A total of 3,099 reports were received for 1913. These reports were from 1,187 associations handling dairy products, 960 handling grain, 111 general merchandise (farmers' cooperative stores), 79 cotton, 456 fruit and produce, 44 livestock, 18 tobacco, and 244 engaged in miscellaneous selling or buying or both. Business to the amount of \$310,300,000 was reported. (See Table 1, p. 14.) This was an average volume of business of \$100,133. Over 70 per cent of the 3,099 associations were in the 12 North Central States.

The 5,424 included in the statistical tabulations for 1915 were distributed through the geographic divisions as follows:

Geographic division	Number of associations	Per cent of total	Estimated number of members	Estimated amount of business
West North Central.....	2,577	47.5	254,425	\$286,534,775
East North Central.....	973	17.9	107,331	90,113,770
Pacific.....	416	7.7	65,950	150,510,979
South Atlantic.....	329	6.1	37,097	10,269,102
West South Central.....	315	5.8	30,793	7,683,734
Mountain.....	232	4.3	34,731	20,485,811
East South Central.....	215	3.9	35,834	7,170,323
Middle Atlantic.....	210	3.9	63,971	56,096,060
New England.....	157	2.9	20,952	6,974,130
Total.....	5,424	100.0	651,084	635,838,684

When arranged according to products handled, the number of associations and percentages are as shown in the table below, which also shows the estimated number of members and the estimated amount of business for each group of associations.

Kind of associations	Number of associations	Per cent of total	Estimated number of members ¹	Estimated amount of business ²
Dairy products.....	1,708	31.5	140,567	\$89,061,370
Grain.....	1,637	30.2	166,726	289,689,218
Fruits and vegetables.....	871	16.0	109,916	201,542,646
Merchandise (farmers' stores).....	275	5.1	59,503	11,677,355
Cotton and cotton products.....	213	3.9	18,404	1,502,007
Livestock.....	96	1.8	13,438	5,623,800
Tobacco.....	43	.8	17,849	6,450,000
All others.....	581	10.7	124,681	30,292,288
Total.....	5,424	100.0	651,084	635,838,684

¹ Table 3, p. 18.

² Table 4, p. 20.

The average number of members per association and the average amount of business per association for the groups of associations handling the various products have been determined to be as follows:

Kind of association	Average number of members per association, 1915 ¹	Average amount of business per association, 1912-1915 ²
Dairy products.....	83	\$48,806
Grain.....	102	143,268
Fruits and vegetables.....	124	161,458
Merchandise (farmers' stores).....	220	52,919
Cotton and cotton products.....	87	161,465
Livestock.....	140	98,777
Tobacco.....	336	156,890
All others.....	231	82,986
All associations.....	122	115,402

¹ From reports from 4,683 associations, Department Bulletin 547, p. 25.

² Averages based on 7,399 reports received during 1912-1915.

Statistical Tables 1 to 4 (pp. 14 to 20) contain in condensed form much of the data collected in connection with the survey of 1913-1915.

COOPERATIVE SALES AND PURCHASES IN 1919

Census data collected in 1919 give the number of farms in the United States that reported cooperative selling or purchasing as 624,527. This number was 9.7 per cent of all the farms. The amount of the sales and purchases was \$806,599,308. Over 500,000 (511,383) farms reported sales through farmers' marketing organizations to the amount of \$721,983,639, and 329,449 farms reported purchases through similar organizations to the amount of \$84,615,669.

Minnesota led all the States in the total number of farms reporting sales or purchases, being credited with 81,145 farms; Iowa was second with 51,630 farms; Wisconsin third, 48,190 farms; Michigan fourth, 47,021; and Kansas fifth, 43,188. The States in which 20 per cent of all farms reporting cooperative sales or purchases are: Minnesota, 45.5 per cent; Nebraska, 32.4 per cent; South Dakota, 30.2 per cent; Kansas, 26.1 per cent; North Dakota, 25.5 per cent; Wisconsin, 25.5 per cent; Iowa, 24.2 per cent; Michigan, 23.9 per cent; California, 22.4 per cent. (See Tables 5 and 6, pp. 22, 24.)

The amounts of the sales and purchases in those States with the largest totals were: California, \$132,312,110; Minnesota, \$89,402,621; Iowa, \$66,164,578; Nebraska, \$54,415,247; Kansas, \$53,954,008; Illinois, \$51,254,154; New York, \$47,177,223; South Dakota, \$35,235,015; Wisconsin, \$32,447,211; North Dakota, \$28,325,369. (See Table 6, p. 24.) Figures 1, 2, 3, and 4 picture the situation in the United States in 1919 as revealed by the reports obtained by the census enumerators.

COOPERATION IN 1921-1924

The third survey was begun at about the time the Capper-Volstead cooperative law was enacted. (Capper-Volstead Act, Public No. 146. 67th Cong., approved, February 18, 1922.) At that time it

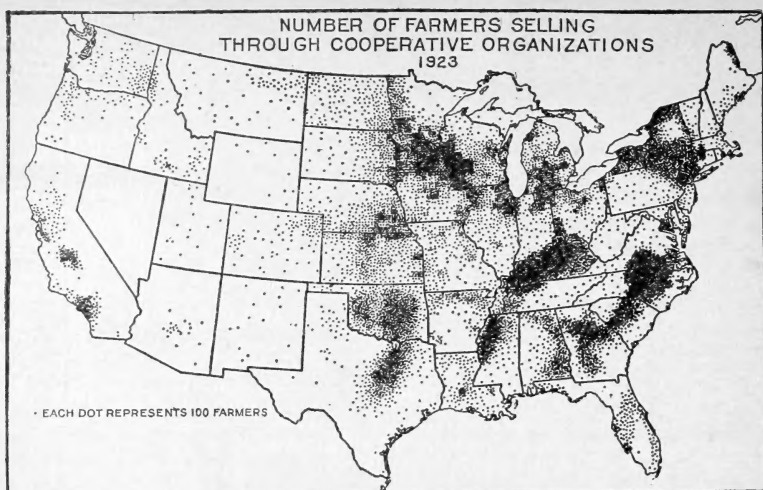

FIG. 5.—Recent development of the cotton, tobacco, grain, and milk marketing associations has completely changed the cooperative map of the United States as will be shown by comparison of this map with Figure 2

FIG. 6.—Minnesota leads all other States in regard to total number of associations; Iowa holds second place and Wisconsin third. (See Table 8.)

Associations by Geographic Divisions, 1915 and 1924

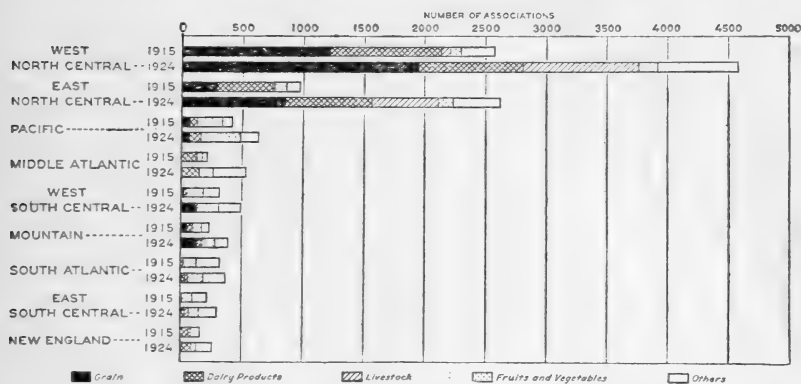

FIG. 7.—Sixty-five per cent of all associations in 1915 were in the 12 North Central States. In 1924 the proportion was 70 per cent. (See Tables 2 and 7.)

Kinds of Associations in Leading States, 1915 and 1924

FIG. 8.—Minnesota led in number of associations in 1915 and 1924. The other leading States, in the order of importance, were Iowa, Wisconsin, and Illinois. (See Tables 3 and 8.)

was felt that there was need for definite information regarding the status of the agricultural cooperative movement in the various States in order that the Secretary of Agriculture might the more intelligently carry out the provisions of the law as occasion required.

In planning the survey more attention was given than formerly to obtaining information regarding the legal status of existing organizations. A greater amount of follow-up work with supplemental questionnaires and personal letters was conducted in connection with the 1922-1924 survey than had previously been possible, and as a result a much larger quantity of information was obtained, classified, and tabulated. A portion of the data collected is made available in the tables comprising the major portion of this bulletin.

At the end of March, 1924, reports had been received from 10,160 associations. In addition to certain basic tables given in the following pages, a number of tables give comparisons for different years. The data given are sufficient for the compiling of many such tables by those who wish to make a more intensive study of the subject.

The 10,160 associations included in the 1924 study were distributed through the nine geographic divisions as indicated in the following table which also shows estimated amount of business for 1923:

Geographic divisions	Associations		Estimated business, 1923	
	Number	Per cent	Amount	Per cent
West North Central.....	4,579	45.1	\$635,800,000	28.9
East North Central.....	2,620	25.8	338,800,000	15.4
Pacific.....	634	6.2	413,600,000	18.8
Middle Atlantic.....	531	5.2	275,000,000	12.5
West South Central.....	492	4.9	92,400,000	4.2
Mountain.....	387	3.8	41,800,000	1.9
South Atlantic.....	363	3.6	145,200,000	6.6
East South Central.....	298	2.9	189,200,000	8.6
New England.....	256	2.5	68,200,000	3.1
United States.....	10,160	100.0	¹ 2,200,000,000	100.0

¹ Not including \$200,000,000 of business by cooperative selling agencies in 19 livestock terminal markets.

Classified according to kind of associations the figures indicating number of associations, estimated number of members, and estimated amount of business are as given below:

Kind	Number reporting, 1924	Estimated number of members, April, 1924	Estimated business, 1923
			<i>Thousands</i>
Cotton.....	107	250,000	\$100,000
Dairy products.....	1,966	200,000	400,000
Fruits and vegetables.....	1,232	200,000	300,000
Grain.....	3,134	400,000	600,000
Livestock.....	1,598	250,000	¹ 250,000
Nuts.....	51	50,000	50,000
Poultry and poultry products.....	56	15,000	50,000
Tobacco.....	25	290,000	150,000
Wool.....	115	50,000	20,000
Miscellaneous selling.....	729	70,000	160,000
Merchandise (farmers' stores).....	717	150,000	50,000
Collective buying.....	430	100,000	70,000
Total.....	10,160	2,025,000	¹ 2,200,000

¹ Not including \$200,000,000 of business by cooperative selling agencies in 19 livestock terminal markets.

The changes in relative importance of the several geographic divisions are shown by the following percentages:

Geographic division	Number of associations		Estimated number of members	Estimated amount of business	
	1915	1924	1915	1915	1923
	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>
West North Central.....	47.5	45.1	39.1	45.1	28.9
East North Central.....	17.9	25.8	16.5	14.2	15.4
Pacific.....	7.7	6.2	10.1	23.7	18.8
Middle Atlantic.....	3.9	5.2	9.8	8.8	12.5
West South Central.....	5.8	4.9	4.7	1.2	4.2
Mountain.....	4.3	3.8	5.4	3.2	1.9
South Atlantic.....	6.1	3.6	5.7	1.6	6.6
East South Central.....	3.9	2.9	5.5	1.1	8.6
New England.....	2.9	2.5	3.2	1.1	3.1
United States.....	100.0	100.0	100.0	100.0	100.0

Changes in the number of associations in the various geographic divisions has not been great but the changes in the distribution among the different divisions of the amount of business transacted is marked. The West North Central, Pacific, and Mountain States have lost in relative importance, and the Middle Atlantic, South Central, South Atlantic, and New England States have gained. These changes seem to indicate that cooperative selling and buying, which 10 years ago was largely confined to the North Central and Pacific States, is becoming more generally established in all parts of the United States.

The total figures for number of associations, estimated number of members, and estimated amount of business, broken up according to kind of associations and converted into percentages, point out further tendencies of the agricultural cooperative movement, as will be noted by the following:

Kind of association	Number of associations		Estimated number of members		Estimated amount of business	
	1915	1924	1915	1924	1915	1923
	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>	<i>Per cent</i>
Grain.....	30.2	30.8	25.6	19.8	45.6	27.3
Dairy products.....	31.5	19.4	21.6	9.9	14.0	18.2
Fruits and vegetables.....	16.0	12.1	16.9	9.9	31.7	13.6
Livestock.....	1.8	15.7	2.1	12.3	.9	11.4
Cotton.....	3.9	1.1	2.8	12.3	.2	4.5
Tobacco.....	.8	.2	2.7	14.3	1.0	6.8
Merchandise (farmers' stores).....	5.1	7.1	9.1	7.4	1.8	2.3
All others.....	10.7	13.6	19.2	14.1	4.8	15.9
Total.....	100.0	100.0	100.0	100.0	100.0	100.0

While there has been a marked increase in the total number of associations, the estimated membership, and the estimated amount of business, the gains for some kinds of associations have been much greater than for others, so that the relative importance of the different kinds of associations has changed materially during the 10-year

FIG. 9.—The percentage of all associations which are incorporated varies from 40 for those handling livestock to 100 for those handling tobacco. (See Table 20.)

FIG. 10.—The percentage of all associations having capital stock for the various lines of commodities varied from 13 for associations handling wool to 97.5 for those handling grain. (See Table 20.)

FIG. 11.—Approximately 85 per cent of the associations handling grain pay dividends on capital stock, 69 per cent of those handling cotton or cotton products, and 53 per cent of those marketing dairy products. Only 2 per cent of those handling nuts pay dividends. (See Table 20.)

FIG. 12.—Most of the farmers' business organizations are composed only of producers of the product or products handled. (See Table 20.)

FIG. 13.—Whether patronage dividends are paid by an association depends largely upon the business methods employed. Such dividends are paid from funds accumulated by charging the members more than the cost of the service rendered. If all but actual cost is returned to members in connection with current transactions, no fund is accumulated from which dividends can be paid at the close of the season or year. (See Table 20.)

FIG. 14.—During the nine years, 1915-1924, the average number of members of associations handling livestock increased from 140 to 161, the average number for associations operating creameries from 83 to 158, for associations handling fruit and vegetables from 124 to 156, and for associations handling grain from 102 to 141. (See Table 21.)

period, 1915-1924. As regards the number of organizations, livestock shipping associations have increased in relative importance, while associations handling dairy products and fruits and vegetables are a smaller fraction of the total number than formerly. Many small associations marketing dairy products have been absorbed by larger organizations. In this way the marketing of dairy products is rapidly becoming a large-scale activity.

The changes in relative importance as regards number of members is marked. These changes are largely the result of the appearance of the state-wide and regional associations with their large memberships in the tobacco and cotton producing sections and to the increase in number of livestock shipping associations.

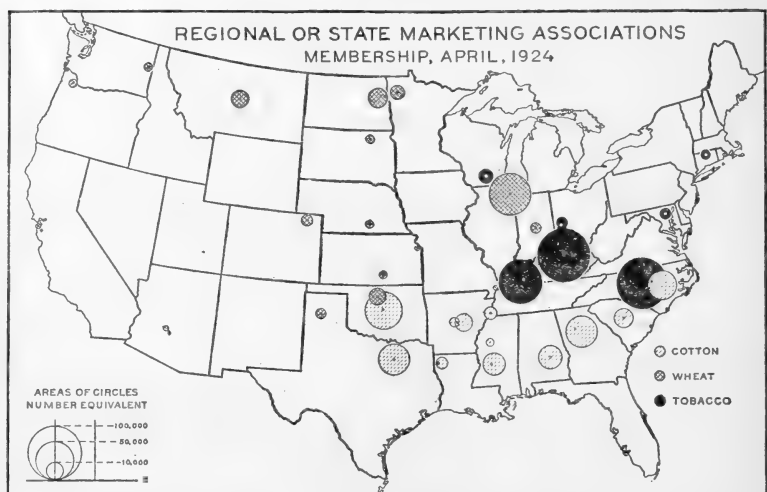

FIG. 15.—Since 1920 nearly 50 associations have been formed which handled but a single commodity and aim to serve an entire producing region or the producers within the boundaries of a State. The most important of the organizations of this new type are the tobacco, cotton, and wheat associations. (See Tables 42, 43, 56, 57, and 58.) The dots in the center of the circles indicate headquarters of associations

The percentages for estimated amount of business show relative losses by the grain associations and those marketing fruits and vegetables, and show relative gains by the organizations handling dairy products, livestock, cotton, and tobacco.

Such data as are available regarding the organizations which have gone out of business during the past 10 years are incorporated in Tables 64 to 70, inclusive. Tables 71 to 95, inclusive, give statistical information for a period of years for about 20 of the larger or best known associations handling various products.

Comments of an interpretative nature have been included in many of the legends beneath the maps and charts.

Average Number of Members for Associations Handling Tobacco, Cotton, and Rice for 1915 and 1924

FIG. 16.—About 1920 the State-wide or region-wide marketing organizations appeared. In the tobacco, cotton, and rice producing sections this new type of association has largely replaced the local association which aimed to serve the farmers tributary to a single shipping point. (See Table 21.)

Estimated Business of Associations in Leading States, 1922

FIG. 17.—The estimated amount of business was determined by multiplying the average amount of business for the associations reporting amount of business by the total number of associations credited to each State

TABLE 1.—Associations of different kinds reporting amount of business, by States, 1913

Percentage of Associations Reporting Business of Various Amounts, 1923

Fig. 18.—Reports from 4,321 associations of amount of business transacted annually indicates that a majority of the associations handling fruits, vegetables, and livestock, and operating creameries and cheese factories are in the group credited with less than \$100,000 per year. Grain-marketing associations fall largely in two groups; that is, under \$100,000 and between \$100,000 and \$200,000. (See Table 26.)

Fig. 19.—During the years from 1915 to 1923 the West North Central, Pacific, and Mountain States lost in relative importance as regards total amount of cooperative business handled. The other groups of States made gains

Distribution of Cooperative Business by Kinds of Associations, 1913, 1915, 1921, 1922

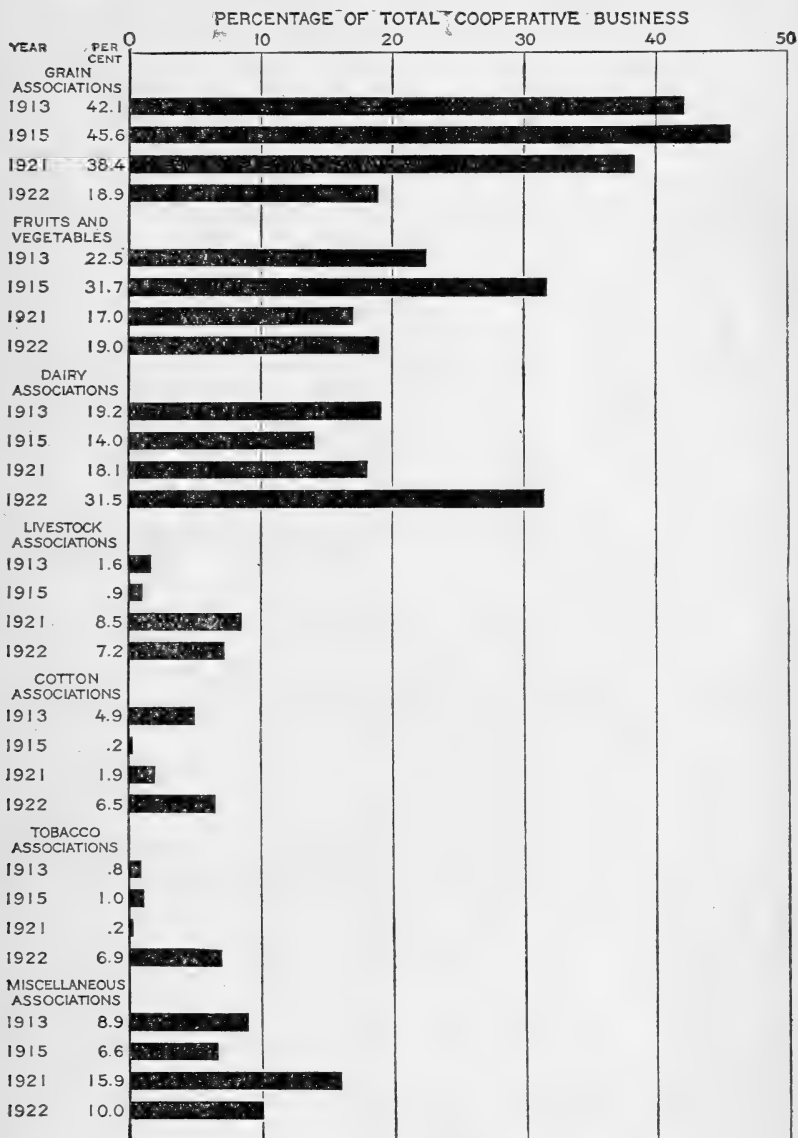

FIG. 20.—Whereas in 1913 over 42 per cent of the total agricultural cooperative business in the United States was transacted by grain-marketing associations, 18.9 per cent was handled by such organizations in 1922. Gains in relative importance were made during the 10-year period by the associations handling dairy products, cotton, and tobacco. (See Table 25.)

Average Amount of Business per Association, 1913 and 1922

FIG. 21.—In 1913 the average amount of business per association for the 3,099 associations reporting was \$100,000 and in 1922 the average amount for the 4,103 associations reporting was \$215,000. While the averages for the tobacco and cotton associations increased greatly, the average for the other groups of associations also increased. (See Table 28.)

Years of Organization for Associations Active March, 1924

FIG. 22.—Reports regarding year of organization have been received from 5,352 associations now active. A larger number of the grain associations were formed in 1919 than in any other year. The banner year for fruit and vegetable associations was 1921, for creameries 1916, for cheese factories 1917, and for livestock-shipping associations 1921. (See Table 29.)

¹ Less than one-tenth of 1 per cent.

FIG. 23.—Grain-marketing associations are found in large numbers in the 12 North Central States, in Oklahoma, in a corner of Colorado, and in Washington. Illinois leads in number of associations and Iowa comes second. (See Table 8.)

FIG. 24.—Illinois, Iowa, Nebraska, North Dakota, and Kansas, in the order named, lead in the number of organizations engaged in the marketing of grain. (See Table 10.)

FIG. 25.—Nearly 70 per cent of all associations handling dairy products are in Minnesota, Wisconsin, and Iowa. (See Table 11.)

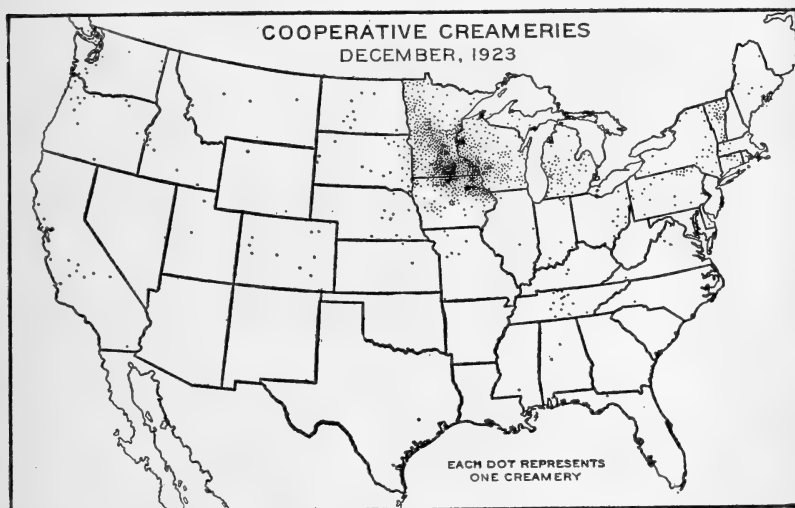

FIG. 26.—Over 40 per cent of all the farmer-controlled creameries from which reports were received in 1923 were in Minnesota, 17 per cent in Iowa, and 16.7 per cent in Wisconsin. (See Table 44.)

Oregon Cooperative Grain Growers' Association ²	Enid, Okla.	September, 1921 ¹	3,200	2,375,000	3,000,000	3,500,000
South Dakota Wheat Growers' Association, Inc.	Portland, Ore.	July, 1921	3,000	218,520	1,000,000	0
Texas Wheat Growers' Association ⁶	Aberdeen, S. Dak.	June, 1923	3,017	2,750,000	3,500,000	4,086,496
Washington Wheat Growers' Association ²	Amarillo, Tex.	May, 1920	65	15,000,000		
Northwest Wheat Growers Associated (selling agency for Washington, Oregon, Idaho, Montana, and North Dakota State associations. Supplanted Aug. 1, 1923, by American Wheat Growers Associated (Inc.).)	Spokane, Wash.	1921				
Southwest Wheat Growers Associated (selling agency for Oklahoma and Texas State associations)	Portland, Oreg., and Minneapolis, Minn.	1921				
American Wheat Growers Associated (absorbed business of Northwest Wheat Growers Association Aug. 1, 1923. Selling agency for Washington, Oregon, Montana, Nebraska, North Dakota, Colorado, Minnesota, and South Dakota State associations).	Enid, Okla.	December, 1922	62	3,179,594	5,652,595	
	Minneapolis, Minn.		69	0	0	

¹ Date incorporated.² Grain sold through Portland and Minneapolis offices of Northwest Wheat Growers Associated.³ In hands of receiver.⁴ Merged into Kansas Cooperative Wheat Marketing Association, Wichita, Kans. (1924).⁵ Grain sold through the Southwest Wheat Growers Associated.⁶ State associations.

FIG. 27.—More than 60 per cent of the farmer-controlled cheese factories in the United States are in Wisconsin. Oregon has the second largest number. There are a few cheese factories in New York, Michigan, and Ohio

FIG. 28.—In nearly all the States there are producer-controlled associations engaged in the marketing of milk as fluid milk, cream, ice cream, condensed milk, or milk powder. The amount of business transacted by these associations varies from a few thousand dollars in the case of the smallest to over \$80,000,000 in the case of the largest

¹ One began operating Mar. 5, 1923.² Began operating May 15, 1923.³ Began operating Oct. 8, 1923.⁴ Began operating May 3, 1923.⁵ Began operating Sept. 1, 1923.⁶ Began operating July 2, 1923.⁷ Only two reporting.⁸ Began operating Feb. 19, 1924.

FIG. 29.—The marketing of fruits and vegetables is carried on by independent local associations and by federations of affiliated local associations. California leads in the number of associations. (See Table 8.)

FIG. 30.—There are more than twice as many associations handling fruits and vegetables in California as in any other State. Reports from Arkansas, New York, and Florida indicate about the same number of organizations in each State. (See Table 12.)

FIG. 31.—Geographic distribution of 1,598 livestock-shipping associations and 26 cooperative selling agencies located in 20 terminal livestock markets. Iowa and Minnesota lead in the number of active livestock-shipping associations. (See Tables 8 and 55.)

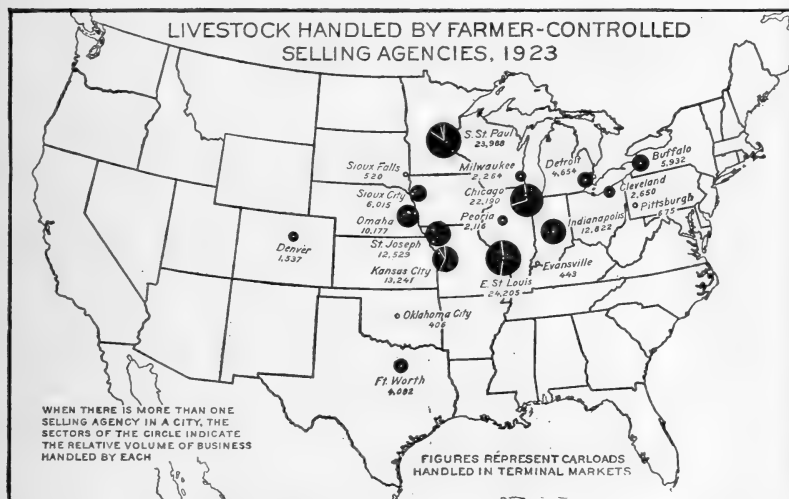

FIG. 32.—Twenty-five producer-controlled livestock-selling agencies operating in 19 terminal markets handled 149,592 cars of livestock in 1923. (See Table 55.) The white dot in each circle indicates location of terminal market

¹ Previous to 1921 the fiscal year ended Aug. 31. Beginning with 1921 date was changed to Oct. 31.² Basis of 400 boxes to a car.

Wool-Marketing Associations in Leading States, 1924

FIG. 34.—Although more than twice as many reports were received from wool-marketing associations in New York State as from any other State, the quantity of wool handled is less than that reported by single associations in several of the other States. (See Table 15.)

Associations Engaged in Handling Merchandise, March, 1934

FIG. 35.—A total of 717 associations reported as engaged in handling commodities at retail. Most of these associations were operating cooperative stores and handling general merchandise, a few were buying only special lines of goods, as fertilizers, dairy feeds, etc. An equal number of reports were received from Minnesota and Nebraska. (See Table 17.)

Miscellaneous Selling Associations, 1924

FIG. 36.—More than 700 marketing organizations which could not be included in any of the commodity groups have been grouped together as miscellaneous selling associations. Some of these sell but a single product, honey for instance, whereas others undertake to market any and all products which their members may deliver. (See Table 16.)

Collective-Buying Associations, 1924

FIG. 37.—Four hundred and thirty of the 10,160 associations reporting were engaged in buying supplies for their members. One hundred of the total number were in Pennsylvania. (See Table 18.)

TABLE 72.—*Sun-Maid Raisin Growers, Fresno, Calif., 1912-1922*

¹ Annual income 1900-1914, taken from 1914 report.² Surplus, 1900-1920, taken from 1922 report.³ Including bonus to employees.⁴ Including bonus to patrons.

⁵ During recent years the dairy products marketed by the company have been carried a little farther on the road leading to the consumers than formerly. Because of this fact additional services have been rendered, additional expenses incurred, and an increased price charged for the products sold. It is obvious that the producer can not receive so large a percentage of the price paid by the retail establishments as that paid by wholesale. The figures in the above table indicating per cent for the years since 1920 are not comparable with those for the preceding years.

⁶ Excluding unexpended patrons' bonus, \$14,840.TABLE 82.—*Twin City Milk Producers Association, St. Paul, Minn., 1918-1923*
